## Big Al's Grand Slam

## Spring 2019

## Madison's Big Boar

3

In Spring 2019 our friend Glen returned with his daughter Madison and family friend Big Al (2). Glen's killed Moose and Bear with us in the past but this time he accompanied hunters Al and Madison. Al killed a young brown-phase (1) and a big Black Bear (2). Even though we saw a lot of bears over the hunt, it took a while for Madison to get here chance. We spotted this big boar (3) and we were able to stalk up on it with all four of us. Set up on the shooting sticks, Madison waited for the right moment and made a perfect one shot kill. And after the hunt we able to kick back and get in some trout fishing (4).

Chris and Gil two buddies that came all the way from California for an Omineca Hunt. Gil took this nice Bear (2) and Chris scored an Omineca first by killing two Seven Foot Boars during one hunt(1) (3).

Paul and Lee from Texas with Paul's white-patched Black Bear(4).

Fall  
2019

## Chuck's Stand-Off

We've almost lost count of how many times Chuck has been hunting with us but Fall 2019 was his first trip for Moose. Chuck and his son, Lucas were each hoping to find a Bull. Pretty early in the hunt we were drifting and paddling in Two Creek Bay when a Cow and Calf appeared, feeding on shore. Within minutes a young Bull appeared. Lucas was first up but he didn't want to take it. **Not one to mess around, Chuck went into kill-mode. The only problem was that by the time Chuck was ready, the Bull was face-on and wouldn't move.** While the Cow and Calf calmly fed to our left the Bull stared at us stock-still for an eternity, at least 5 minutes. Lucas snapped this pic during the great stand-off. Chuck staying cool and ready, when the Bull finally turned Chuck whacked 'em good. I've guided a lot of Moose kills in my day and this was as exciting as any of them.

## Fall 2019

1

Lucas, here with his Dad, got his chance at a Bull (1) on day four of the hunt and did his job good. **Lucas got a trophy and a perfect meat Bull and a lot of meat it was (2).** After Chuck killed his Bull we had a conversation about Bull size and expectations. As Guides, we do our best to get every hunter a chance at an animal they'd be happy with. And as Hunters giving fair-chase, we know the goal is to enjoy nature and the companionship of the hunt and to be ready to cleanly kill the game we decide to harvest. To us, that's the definition of success. (3) Outfitter's Moose ProTip: An evening sighting of a Cow and female Calf. Note the white spot under the tail that only female Moose have.

Since he was a young buck, Fred has done a lot of hunting. But in recent years, life just kinda got in the way. So after hearing Fred's Elk and Sheep hunting stories, his good buddy Wes figured it was time to get him out again. Well, we had a helluva hunt together and Fred made it look easy.

**Fall 2019**

(2) The weather played nice, especially toward the end of the season. Pictured above is our hard working **Camp Shut-down Team: Brett, Peter and Matt**

Thanks to all our guests, hunters and crew for great season., especially Masterguide **Wes** and my dear, **Jill**. We seem to have more fun every year. After losing our lab, **Lou** last year, we're happy have **Van** to fill his spot in camp and in our hearts in the coming years.
